

# EVANSVILLE HAS WATER...FOR NOW

THE DRY SEASON IS ALREADY UNDERWAY.

CONSERVING OUR WATER NOW WILL HELP ENSURE THAT WE HAVE ENOUGH WATER LATER AND COULD PREVENT FUTURE WATER RESTRICTIONS.

- Do not water between 10am-6pm.
- Stick to watering lawn 2-3 times per week. Promotes strong roots
- Avoid watering sidewalks, driveways & streets (they won't grow 😊)
- Skip watering during rain or strong winds
- Keep grass a little taller to help hold moisture
- Hold off on fertilizing during drought conditions
- Give trees and shrubs steady, deep watering
- Fix leaks and broken sprinklers to avoid water waste

Residents might notice city crews flushing fire hydrants. This is work that is necessary to keep drinking water safe and clean, and will continue during the dry conditions.

YOU MAY BE JUST A DROP.....

EVERY DROP CREATES RIPPLES

**WATER IS PRECIOUS!**

**BE WATER WISE** 😊
